ASTONISHING LINEN

EDITO

À l'écoute de ses adhérents filateurs et tisseurs et attentive aux évolutions des marchés de la mode et de la déco, l'Alliance soutient des messages forts en faveur de l'innovation, incitant à des nouvelles propositions créatives et à de nouveaux usages pour le Lin. L'étonnement est un moteur puissant et cette saison, le Lin attise la curiosité avec des propositions fortes. Visibles et tactiles !

La couleur est présente, enjouée, elle joue l'effet de surprise et se fraye un chemin hardi au sein des palettes naturelles attendues pour le Lin et le Chanvre.

Les touches sont éloquentes, les mains ont du caractère, fluides et fraîches ou compactes et souples, magnifiant le naturel végétal et le confort avéré de la fibre.

Délaissant le trop moyen, les poids et les densités s'affirment dans leurs extrêmes. Tissus serrés, intenses d'un côté, ou structures aérées de l'autre. La légèreté à la limite de la transparence amplifie les propriétés climatiques du Lin.

En complément de cette riche offre Lin, le Chanvre commence à apparaître dans les propositions créatives de cette saison 2026 ; l'Alliance est engagée pour structurer la filière européenne et développer une offre fibre Chanvre.

By listening to its spinning and weaving members and keeping abreast of developments in the fashion and interior design markets, the Alliance is supporting strong messages in favour of innovation, encouraging new creative proposals and new uses for Flax-Linen. Surprise is a powerful driving force, and this season, Flax-Linen is arousing curiosity with some powerful proposals. Visible and tactile!

Colour is present and playful, playing on the surprise effect and boldly making its way through the natural palettes expected of Flax-Linen and Hemp.

The touches speak for themselves, the hands have character, fluid and fresh or compact and supple, magnifying the naturalness of the plant and the proven comfort of the fibre.

Moving away from the too average, weights and densities assert themselves in their extremes. Tight, intense fabrics on the one hand, or airy structures on the other. Lightness bordering on transparency amplifies the climatic properties of Flax-Linen.

In addition to this broad selection of Linen, Hemp is also making an appearance in the creative offerings of the 2026 season. The Alliance is committed to building a structured European sector and developing an offer of Hemp fibre.

Fleeting reflections and shimmers illuminate the surfaces of natural Flax-Linen.

TOUCHERS ÉLOQUENTS

Des touchers secs, des sensations de grain de crêpe, des enductions ultra mates pour des mains plus techniques. Un Lin avec du corps et de l'esprit.

TACTILE NATURE

Dry touches, the feel of crepe grain, ultra-matt coatings for more technical hands. It's all about Linen with body and spirit.

VIVACITÉ-FLUIDITÉ

Des Lins à l'élasticité naturelle ou raisonnée qui invitent au confort et à des vêtements multusage, chic et sport.

VIVIDLY FLUID

Flax-Linen with natural or reasoned elasticity, that invite comfort and multi-purpose clothing, chic and sporty.

Bcomp x EcoTechnilin x Alliance for European Flax-Linen & Hemp

Le stand de l'Alliance fait dialoguer subtilement la juxtaposition entre Lin, Chanvre et bois : synonyme de créativité, naturalité et authenticité.

En partenariat avec nos membres spécialistes du matériau composite, les designers ont imaginé une partie du décor composée de panneaux 100% biosourcés :

- Panneaux en Kairlin®, fournis par la société EcoTechnilin, conçu à base de Lin, à la fois rigide, esthétique et recyclable. (Il s'agit d'une alternative écologique pour des applications signalétiques et du mobilier.)
- Panneaux en ampliTex™ et powerRibs™, technologies de renforcement et d'allègement à base de fibres naturelles développées par l'entreprise Bcomp qui réduisent l'impact environnemental, offrent un amortissement des vibrations et un look unique dans des applications de haute performance (intérieur automobile, sport automobile, sport, infrastructure, aérospatiale et même à l'espace).

The Alliance stand creates a subtle dialogue between Flax-Linen, Hemp and wood, which are synonymous with creativity, naturalness and authenticity.

In partnership with our members who are specialists in composite materials, part of the decor is made of 100% bio-sourced panels:

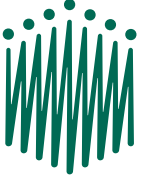

- EcoTechnilin provided Kairlin® panels made from plant fibres (Flax or Hemp), which are rigid, aesthetic (available in three colours, with visible fibres) and recyclable (an eco-friendly alternative for signage, POS and furniture applications).
- Bcomp's AmpliTex™ and PowerRibs™ panels use natural fibre-based technology to strengthen and lighten materials, while reducing environmental impact, offer vibration damping and a unique look for high performance applications (automotive interiors, motor sport, sports, infrastructure, aerospace and even space).
