ASTONISHING LINEN

EDITO

All'ascolto dei propri membri filatori e tessitori e attenta agli sviluppi dei mercati della moda e dell'arredamento, Alliance promuove messaggi forti a favore dell'innovazione, che incoraggiano nuove proposte creative e nuovi utilizzi del Lino. Lo stupore è un motore potente e in questa stagione il Lino suscita curiosità grazie a proposte di grande impatto per la vista e il tatto!

Il colore c'è, è allegro e gioca sull'effetto sorpresa, irrompe con audacia sulla tavolozza dei colori naturali classici per il Lino e la Canapa.

Materiali che al tatto sono eloquenti, con una mano nettamente caratterizzata, fluida e fresca o compatta e morbida, che esalta la natura vegetale e il comfort certo della fibra.

Disdegnando il troppo medio, i pesi e le densità a si affermano nei loro valori estremi. Tessuti fitti, intensi da un lato, o strutture ariose dall'altro. La leggerezza al limite della trasparenza amplifica le proprietà climatiche del Lino.

A completare questa ricca offerta per il Lino, la Canapa comincia ad apparire nelle proposte creative di questa stagione 2026; l'Alliance è impegnata a strutturare la filiera europea e a sviluppare un'offerta per la fibra di Canapa

By listening to its spinning and weaving members and keeping abreast of developments in the fashion and interior design markets, the Alliance is supporting strong messages in favour of innovation, encouraging new creative proposals and new uses for Flax-Linen. Surprise is a powerful driving force, and this season, Flax-Linen is arousing curiosity with some powerful proposals. Visible and tactile!

Colour is present and playful, playing on the surprise effect and boldly making its way through the natural palettes expected of Flax-Linen and Hemp.

The touches speak for themselves, the hands have character, fluid and fresh or compact and supple, magnifying the naturalness of the plant and the proven comfort of the fibre.

Moving away from the too average, weights and densities assert themselves in their extremes. Tight, intense fabrics on the one hand, or airy structures on the other. Lightness bordering on transparency amplifies the climatic properties of Flax-Linen.

In addition to this broad selection of Linen, Hemp is also making an appearance in the creative offerings of the 2026 season. The Alliance is committed to building a structured European sector and developing an offer of Hemp fiber.

Bcomp x EcoTechnilin x Alliance for European Flax-Linen & Hemp

Lo stand dell'Alleanza combina in modo sottile l'accostamento di Lino, Canapa e legno: sinonimo di creatività, naturalezza e autenticità.

In collaborazione con i nostri membri specializzati in materiali compositi, i progettisti hanno creato una parte dell'arredamento costituita da pannelli 100% biobased:

- I pannelli Kairlin®, forniti dalla società EcoTechnilin, un materiale a base di Lino rigido, estetico e riciclabile. (Si tratta di un'alternativa ecologica per applicazioni di segnaletica e arredamento).
- Pannelli in AmpliTex™ e PowerRibs™, tecnologie di rinforzo e alleggerimento basate su fibre naturali sviluppate dall'azienda Bcomp che riducono l'impatto ambientale, offrono smorzamento delle vibrazioni e un look unico in applicazioni ad alte prestazioni (interni di automobili, sport motoristici, sport, infrastrutture, aerospazio e persino nello spazio).

The Alliance stand creates a subtle dialogue between Flax-Linen, Hemp and wood, which are synonymous with creativity, naturalness and authenticity.

In partnership with our members who are specialists in composite materials, part of the decor is made of 100% bio-sourced panels:

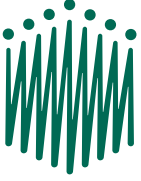

- EcoTechnilin provided Kairlin® panels made from plant fibres (Flax or Hemp), which are rigid, aesthetic (available in three colours, with visible fibres) and recyclable (an eco-friendly alternative for signage, POS and furniture applications).
- Bcomp's AmpliTex™ and PowerRibs™ panels use natural fibre-based technology to strengthen and lighten materials, while reducing environmental impact, offer vibration damping and a unique look for high performance applications (automotive interiors, motor sport, sports, infrastructure, aerospace and even space).

About

Alliance for European Flax-Linen & Hemp

L'Alleanza per il Lino e la Canapa europei è l'unica organizzazione europea agroindustriale di riferimento su scala mondiale che unisce tutti gli attori della catena del valore del Lino e della Canapa europei.

L'Alleanza per il Lino e la Canapa europei ha una triplice mission: informare i membri, i brand e i consumatori; sostenere l'ecosistema e i know-how europei; promuovere il Lino e la Canapa europei come fibre di qualità premium sostenibili e preferite nel mondo. Riunisce oltre 10 000 imprese di 16 Paesi europei e svolge azioni fondate sui valori di collettività, innovazione, validità scientifica e rispetto degli esseri umani e del pianeta.

Opera per la visibilità internazionale del Lino e della Canapa europei, le cui qualità tecniche e ambientali sono fonte di ispirazione creativa mondiale e offrono nuove prospettive all'innovazione industriale. Garantisce la tracciabilità della fibra di Lino mediante le certificazioni Masters of Flax Fibre™ (ex-European Flax™) e Masters of Linen™.

L'Alleanza per il Lino e la Canapa europei è il nuovo nome della CELC, associazione fondata nel 1951. L'Europa occidentale è il primo produttore mondiale di fibre di Lino (Francia, Belgio e Paesi Bassi garantiscono 3/4 della produzione).

The Alliance for European Flax-Linen & Hemp is the only European agro-industrial organization that serves as a global reference and brings together all players in the European Flax-Linen and Hemp value chain.

The Alliance for European Flax-Linen & Hemp has a three-fold mission of informing members, brands, and consumers, supporting the European ecosystem and European expertise, and promoting European Flax-Linen and Hemp as the preferred sustainable premium fibers worldwide. It connects 10,000 businesses in 16 European countries and bases its work on the values of solidarity, innovation, scientific validation, and respect for people and planet.

It strives to increase the international visibility of European Flax-Linen and Hemp, whose technical and environmental properties inspire global creation and open up new opportunities for industrial innovation. It guarantees the traceability of Flax fiber thanks to the Masters of Flax Fibre™ (ex-European Flax™) and Masters of Linen™ certifications.

The Alliance for European Flax-Linen & Hemp is the new name of the CELC, an association founded in 1951. Western Europe is the number one Flax-producing region in the world (France, Belgium, and the Netherlands account for 3/4 of production).
