

How to become Masters of Flax Fibre™ certified

Step 2 – See how to become certified depending on your organization type

1. See contact details at allianceflaxlinenhemp.eu
2. For sites involved exclusively in trading, documentary audits only.
For sites involved in trading and processing activities that are exclusively subcontracted, contracting organisation is audited off-site only, while the processing subcontractors are subject to on-site audits by Bureau Veritas depending on their risk levels.
For sites involved both in trading AND in processing activities in-house, refer to the certification process of a Processor.
3. Composition tests are mandatory for processors involved in an activity of spinning, weaving, knitting, production of technical semi-products, preparation to spinning, cottonizing, or any activity with a high risk of fibre blending, either internal or outsourced

All reference documents are available on our allianceflaxlinenhemp.eu
